

Test report

Nr. Q IWQ MBL 734 1109-1.e

Applicant:
DuPont de Nemours N.V.
A. Spinoystraat 6
2800 Mechelen
Belgium

Test object:
Solid surface top "DuPont Montelli"
(Sample supplied by the client)

Commission:
Material tests with reference to DIN ISO 4586-2,
: 04.1997; Specifications according to DIN EN 438 - part 1,
: 1991

Statement:

The solid surface top - trademark "DuPont Montelli" were submitted to comprehensive material tests with reference to DIN ISO 4586-2.

The scope of testing was the determination of material parameters, thermic loads and mechanic requirements.

The test report FE K 04075H021 of the material parameters dated: March 01, 04, the report UB Nr. 0411048-03 on the results of the DIN 51 130 requirements (inclined plane) dated: March 02, 04 and the report Q EMA SMG 814 1131 on electric conductivity according to DIN EN 6134051 dated: March 08.,04 constitute part of the complete test.

In summary it may be stated that all parameters determined under test conditions satisfy the requirements for classification HDS (Horizontal Heavy Duty Standard) DIN EN 438 - part 1.
